

Practical: Convergence Diagnostics

Instructors: Kari Auranen, Elizabeth Halloran and Vladimir Minin

July 20 – July 22, 2020

Examining MCMC output in the chain-binomial Gibbs sampler

Here, we will have a look at some diagnostic tools provided in the R package "coda." Download the script "diagnostics.R" that examines convergence of the chain-binomial Gibbs sampler. We will go over this script during the practical.

Your task

Use "coda" package tools to examine convergence of SIR MCMC (R script "SIRaugmentation.R").
